TLT STRATEGIC SOLUTIONS

Government & Commercial Services

Systems Engineering & Operational Governance

CORE COMPETENCIES

SYSTEMS ENGINEERING

- Requirements Allocation
- System Specifications
- Verification & Validation
- Lifecycle Controls
- Risk & Hazard Analysis

OPERATIONAL GOVERNANCE

- Workflow Optimization
- Variance Reduction
- Compliance Programs
- Lab Governance
- Performance Metrics

PMO OPTIMIZATION

- Decision Support
- Program Recovery
- Capital Planning
- Resource Alignment
- Execution Tracking

FIRM PROFILE

Entity:	**TLT Strategic Solutions**
Structure:	**Texas LLC**
Location:	**Nationwide**
SAM.gov:	**Active Registered**
UEI:	**M1HFTP8D5LR5**
CAGE Code:	**22R08**

NAICS CODES

541611	Management Consulting (Primary)
541512	Systems Design Services
541330	Engineering Services
541614	Process & Logistics Consulting

FIRM OVERVIEW

TLT Strategic Solutions, LLC is a management consulting firm specializing in systems engineering, operational governance, and technical integration for organizations operating in high-consequence, mission-critical environments. We bridge the gap between high-level executive vision and floor-level tactical execution. Our core capability lies in diagnosing complex operational bottlenecks, engineering scalable workflows, and implementing robust governance controls that optimize throughput, reduce variance, mitigate enterprise risk, and ensure sustainable project performance across the entire program lifecycle.

DIFFERENTIATORS

- **15+ Years Prime Leadership:** Proven track record directing complex engineering programs and operational transformations across top-tier aerospace, defense, and healthcare environments.
- **Fractional Executive Delivery:** High-impact executive expertise and milestone steering tailored to project needs without long-term executive overhead.
- **Systems-Driven Methodology:** Root-cause analysis and process controls that create sustainable, repeatable operational improvements.
- **Agile & Responsive Operations:** Direct principal involvement, lean management structure, and rapid deployment for client engagements.

RELEVANT EXPERIENCE

Aerospace & Defense Systems Engineering

Led engineering initiatives and multi-disciplinary teams in high-consequence defense environments. Implemented systems engineering disciplines, configuration controls, and operational turnarounds that restored project baselines and ensured schedule compliance.

Healthcare & Diagnostics Operational Integration

Spearheaded operational alignment, PMO integration, and compliance frameworks across global diagnostics and laboratory operations. Streamlined complex hardware and software integration protocols to accelerate throughput and maintain regulatory readiness.
